

# BENOIT DUPONT

## Passionate Java Developer

@ benoit.dupont@gmail.com    +32-476-36-85-13    Chaumont, Belgium  
in linkedin.com/in/benoit-dupont-86429719    github.com/benoitdupont

Enthusiastic software engineer with 12 years experience developing simple and robust code for critical applications.

## EXPERIENCE

### Technical Architect

#### eHealth/Smals

June 2013 – Ongoing    Brussels, Belgium

- Designed and developed Soap and Rest secure and high availability web services and batches for the health sector, with Jakarta EE and Spring backends, hosted on Openshift with Oracle database
- Participated into project meetings with all stakeholders, from client and project managers to analysts and developers, to build software architecture from business requirements
- Migrated all eHealth services from VM's to IaaS, then PaaS, as one of the leading members of the migration pilot team
- Conducted technical watch and elaboration of several poc's to try new solutions like Spring Boot, Git, Jboss, Api Gateway, ...
- Evaluated new candidates for hiring prospects

### Senior Java Developer

#### Amoobi

December 2012 – June 2013    Nivelles, Belgium

- Industrialized a product that analyze customer flows in retail stores with geo-localization, by adding a workflow and a batch framework, in a Jakarta EE environment with JPA and Spring Batch, on a MySQL Database

### Java developer

#### BSB

January 2010 – December 2012    Louvain-la-Neuve, Belgium

- Participated at the development of a Java-based Domain Specific Language to describe declaratively the UI, which can be linked with any UI technology, with Vaadin as a reference implementation.
- Conducted performance troubleshooting and transaction refactoring for a banking product (Soliam)
- Developed new features for Soliam, a web-based banking application in Flex, with a Java backend running on JBoss and Jakarta EE

### Java developer

#### I.R.I.S. Solution and Expert

October 2008 – January 2010    Louvain-la-Neuve, Belgium

- Developed new features for a web-based Enterprise Content Management product (IRISNext) in Javascript, with a Java backend
- Integrated, customized and installed the product IrisNext on various client sites

### IT Researcher

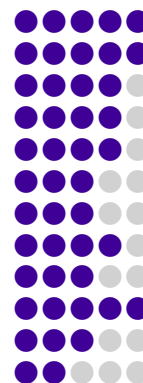

#### Catholique de Louvain (UCL/EPL)

October 2007 – August 2008    Louvain-la-Neuve, Belgium

- Elaborated a state of the art of the various techniques used for software fault tolerance for embedded systems in harsh environment, in preparation of a PhD thesis

## SKILLS

Java  
Spring  
Jakarta EE: Ejb, Jpa, Jms, ...  
Rest, OpenApi, Keycloak  
SOAP WS, WSS  
Jboss AS  
Openshift  
Oracle Service Bus 11g  
Oracle Database 11g  
Maven  
Vaadin  
Python

## STRENGTHS

Pragmatic    Autonomous  
Solution-oriented    Team player  
TDD Adept    Creative

## EDUCATION

Complementary master in computer science

UCL/EPL Louvain-la-Neuve, Belgium

September/2007 – September/2009

Master in computer science, cum laude

UCL/EPL Louvain-la-Neuve, Belgium

September/2005 – June/2005

Bachelor in computer science, summa cum laude

EPHEC Louvain-la-Neuve, Belgium

September/2002 – June/2005

## LANGUAGES

French  
English  
Dutch
